

Advantar Laboratories Receives Drug Manufacturing License from the California Food and Drug Branch

DATE OF RELEASE

May 14, 2010

10:00 AM ET

San Diego, CA – Advantar Laboratories received approval to manufacture and ship pharmaceutical products by the California Department of Public Health, Food and Drug Branch (Cal FDB).

Richard Kenley, President and CEO – Advantar Laboratories commented “We are pleased to obtain the approval of the Cal FDB. This milestone represents a logical next step in our continuous effort to build a high quality contract pharmaceutical services company to support our customers and their needs in the development of pharmaceutical products.”

Led by a team of industry veterans, Advantar provides expertise in virtually all dosage forms as well as small molecule, peptide, protein, and oligonucleotide drug molecules. Advantar’s GMP-compliant services include: pre-formulation and formulation development, analytical methods development and validation, release and stability testing, compendial analysis, and clinical trial material labeling and packaging.

You can learn more about Advantar Laboratories and the executive team at the upcoming [2010 AAPS Annual Meeting](#), or visit our website at www.advantarlabs.com.
